

#### **Features**

- Hot Pluggable QSFP+ form factor
- Operating data rate 41.26Gbps
- Single +3.3V power supply
- LC duplex connector
- Max power dissipation <3.5W</li>
- Minimum link length of 100m on OM3 MMF
- Minimum link length of 150m on OM4 MMF
- Built-in digital diagnostic function
- Commercial temperature range 0°C to 70°C

## **Compliance**

- QSFP+ MSA
- Compliant with QSFP Electrical MSA SFF-8636
- Compliant with QSFP Mechanical MSA SFF-8665
- IEEE 802.3bm
- RoHS

## **Applications**

- Switches with QSFP+ ports
- Router with QSFP+ Ports
- Server or Network Adapter Card
- Optical Transmission System
- Other devices with QSFP+ Ports

## **Description**

The 40G-QSFP-SR-BD is a high-performance, four-channel, pluggable QSFP+ transceiver designed for short-range duplex data communication and interconnect applications in 40 Gigabit Ethernet (40GbE) networks. It integrates four electrical data lanes, each operating at 10.3125 Gbps, into a single LC duplex fiber-optic cable, enabling an aggregate bandwidth of 40 Gbps. This transceiver utilizes bi-directional optics, transmitting and receiving data over one simplex LC fiber with wavelengths of 850 nm and 900 nm, respectively. This innovative design allows the reuse of existing LC duplex cabling infrastructure, making it a cost-effective solution for upgrading to 40GbE.

The 40G-QSFP-SR-BD supports link distances of up to 100 meters on OM3 and 150 meters on OM4 multi-mode fiber, making it ideal for data center interconnects and high-density networking environments. It complies with the 40GE XLPPI interface and internally multiplexes the 4x10G electrical lanes into two 20 Gbps channels for efficient optical transmission. The module features a 38-contact QSFP+ edge connector for the electrical interface and a standard LC duplex connector for the optical interface. With its compact form factor, low power consumption, and compatibility with existing infrastructure, the 40G-QSFP-SR-BD is a reliable choice for high-speed, short-range 40GbE applications.

### **Product performance Specifications**

#### 1. Basic Product Characteristics

Parameter	Symbol	Min	Тур.	Max	Unit
Storage Temperature	Ts	-40	-	+85	°C
Supply Voltage	Vcc	-0.5	-	4	V

**Note1:** GND is the symbol for signal and supply (power) common for the QSFP+ module. All are common within the QSFP+ module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.

Note2: Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently. Requirements defined for the host side of the Host Edge Card Connector are listed in Table. Recommended host board power supply filtering is shown in Host board power supply circuit. Vcc Rx Vcc1 and Vcc Tx may be internally connected within the QSFP module in any combination. The connector pins are each rated for a maximum current of 500 mA.

Note3: High-speed signal interfaces require differential pairs (e.g. TX1+/TX1-) with tightly matched impedances (typically 100Ω).

Note4: The management and control signals are based on LVTTL level logic and are used for functions such as module selection and reset.

# **Mechanical Dimension**

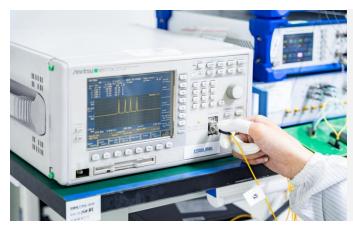

#### **Test Center**

#### 1. Performance Testing

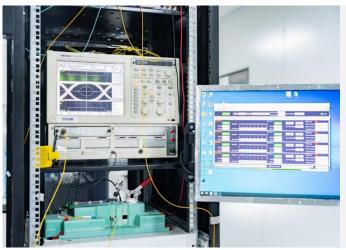

Every fiber optic transceiver is thoroughly tested by the LSOLINK Assurance Program, which is equipped with the world's most advanced analytical equipment to ensure that our transceivers meet the industry's international public protocol standards while still functioning flawlessly in your facility.

#### **Optical Spectrum Inspection**

Using the industry's leading optical spectrum analyser to check in real time that the parameters of the optical transceiver's laser comply with industry standards.

- Peak: Peak wavelength and peak level
- > 2nd Peak: Side-mode wavelength and level
- > Mean WI: Center wavelength
- Total Power: Total power of spectrum
- SMSR: Side-Mode Suppression Ratio

#### **Optical Signal Quality Inspection**

Using highly efficient sampling oscilloscopes and BERT testers, equipped with an automated test platform to accurately test the signal quality of the transceiver, test records are kept for up to 5 years to ensure the traceability of each transceiver.

- Eye Mask Margin(NRZ)
- > TDECQ(PAM4):transmitter dispersion eye closure
- > OMA: Optical modulation amplitude
- **BER:** Bit error rate
- ER: Extinction Ratio

#### **Flow Pressure Test**

Using multi-protocol network traffic analyser with various brands of switches to test the transceiver's ability to transmit at full speed.

- **Bandwidth:** Actual transceiver bandwidth on the port
- Packet Loss
- Packet Errors:CRC Errors/PCS Errors/Symbol Errors
- LinkDown Counts
- > latency

Aboveis part of our test bed network equipment. For more information, Please click <u>download</u> for optical transceiver performance test report.

## 2. Quality Control

We adopt advanced quality management solutions. Each transceiver is self-inspected, including:20x microscope inspection, 200x microscope inspection, and QC process inspection.

visual inspection

**Microscopic inspection: 20X** 

**Microscopic inspection: 200X** 

**Reliability Verification** 

**Optical endface inspection** 

**OQC** Inspection

### 3. Compatibility Testing

Each optical transceiver is tested in LSOLINK's library of compatibility test equipment to ensure perfect compatibility with multiple brands on the market.

Arista DCS-7060SX2-48YC6-R

Aruba 8360-32Y4C

**Brocade ICX-7750-48F** 

Cisco Catalyst C9500-24Y4C

**Dell S4048-ON** 

HuaweiS6720-30L-HI-24Seme

Aboveis part of our test bed network equipment. For more information, Please click <u>download</u> to get the compatibility test report of each brand of optical transceiver.

# **Order Information**

Part Number	Description
40G-QSFP-SR4	40GBASE-SR4 QSFP+ 40G 850nm 100m DOM MTP/MPO-12 UPC MMF Transceiver Module
40G-QSFP-CSR4	40GBASE-CSR4 QSFP+ 40G 850nm 300m DOM MTP/MPO-12 UPC MMF Transceiver Module
40G-QSFP-LX4	40GBASE-LX4 QSFP+ 40G 1310nm 2km DOM LC MMF/SMF Transceiver Module
40G-QSFP-LR4	40GBASE-LR4 QSFP+ 40G SMF 1310nm 10km DOM LC SMF Transceiver Module
40G-QSFP-ER4	40GBASE-ER4 QSFP+ 40G 1310nm 40km DOM LC SMF Transceiver Module
40G-QSFP-ZR4	40GBASE-ZR4 QSFP+ 40G 1310nm 80km DOM LC SMF Transceiver Module
40G-QSFP-PIR4	40GBASE-PIR4 QSFP+ 40G 1310nm 1.4km DOM MTP/MPO-12 APC SMF Transceiver Module
40G-QSFP-PLR4	40GBASE-PLR4 QSFP+ 40G 1310nm 10km DOM MTP/MPO-12 APC SMF Transceiver Module
40G-QSFP-SWDM4	40GBASE QSFP+ 850nm 350m DOM Duplex LC MMF Optical Transceiver Module
40G-QSFP-SR-BD	40GBASE-SR Bi-Directional Duplex LC MMF 150m Optical Transceiver Module
