Description

The 10G-SFP-D32-20 is a high-performance SFP+ transceiver module designed for 10Gbps data transmission over single-mode fiber. It supports various applications, including 10GBASE-LR/LW as defined by IEEE 802.3ae. The module features a 20-pin SFP+ connector, ensuring hot-pluggable functionality for ease of installation and maintenance.

Operating at a nominal wavelength of 1330nm (transmit) and 1270nm (receive), the 10G-SFP-D32-20 is engineered for long-distance communication over single-mode fiber. The transmitter section incorporates a multiple quantum well DFB laser, compliant with IEC-60825 Class 1 laser safety standards. For reception, the module utilizes an integrated InGaAs detector preamplifier (IDP) with a limiting post-amplifier IC, ensuring reliable signal integrity over extended distances.

This compact and robust transceiver is ideal for high-speed, high-performance networking, offering excellent stability and efficiency in various optical communication systems.
