## Description

The 10G-SFP-D32-40 is a high-performance single-mode SFP+ transceiver designed for duplex optical data communications, in compliance with IEEE 802.3ae standards. Featuring a 20-pin SFP+ connector, this module supports hot-pluggable functionality, enabling easy installation and replacement without interrupting the network.

Operating over single-mode fiber, the 10G-SFP-D32-40 transmits at a nominal wavelength of 1270nm and receives at 1330nm, making it suitable for long-distance communication. The transmitter utilizes a multiple quantum well DFB laser, which is compliant with Class 1 laser safety standards according to IEC-60825. The receiver section integrates an InGaAs detector preamplifier (IDP), mounted within the optical header, and features a limiting post-amplifier IC for high-quality signal reception.

This module is optimized for high-speed, reliable data transmission over long distances, making it ideal for use in a variety of networking applications, including enterprise networks and service provider transport systems.
