Description

The 1G-SFP-D54-80 is a high-performance BiDi (Bidirectional) Small Form-Factor Pluggable (SFP) transceiver designed for ultra-long-range Gigabit Ethernet applications over single-mode fiber (SMF). It operates on two wavelengths: 1490nm for transmitting data and 1550nm for receiving data, enabling bidirectional communication over a single fiber strand. This transceiver supports data rates of up to 1.25Gbps and is fully compliant with the IEEE 802.3 Gigabit Ethernet standard and SFP Multi-Source Agreement (MSA). With an impressive transmission distance of up to 80 kilometers, it is ideal for long-haul point-to-point links, metropolitan area networks (MANs), and wide area networks (WANs).

The 1G-SFP-D54-80 provides a cost-effective and space-saving solution by reducing the need for additional fiber infrastructure, making it perfect for high-density deployments. Its hot-pluggable design ensures easy installation and maintenance, while its low power consumption enhances energy efficiency. Equipped with digital diagnostics monitoring (DDM) capabilities, the transceiver offers real-time performance tracking, simplifying network management and troubleshooting. Whether deployed in telecommunications, data center interconnects, or enterprise networks, the 1G-SFP-D54-80 delivers reliable performance and flexibility for ultra-long-distance bidirectional communication needs.
